SOFTWARE DEVELOPER

Dedicated and motivated Computer Science graduate seeking to contribute to all stages of the software development lifecycle as a Java Developer. Adept at designing, implementing, and maintaining Java-based applications. Eager to apply analytical skills and knowledge of Java to deliver high-quality software solutions.

EDUCATION

Bachelor of Technology

2020 - 2024

Computer Science and Engineering

Minor in Electronics and Communication Engineering

College of Engineering Aranmula

CGPA : 7.91 / 10 (First Class)

SKILLS

FRONT END DEVELOPMENT | HTML • CSS • JavaScript

BACK END DEVELOPMENT | Java • SQL

Proficiency in Object Oriented Programming Concepts

Deep understanding about **SDLC**

MISCELLANEOUS | Git

OPERATING SYSTEMS | Windows • Linux

PERSONAL PROJECT

ClimaGuard: AI Disaster Prediction & Weather Monitoring.

Ideated and developed system for our final year project to provide real-time alerts and updates, improving disaster response and community safety.

Developed a platform for personalized risk assessments, community collaboration to promote sustainable practices .

Tech Stack:

Frontend - HTML, CSS, JavaScript :**Backend** - Python, Flask

Automatic Cleaning And Disinfecting System

Developed an Automatic Cleaning and Disinfecting Robot with ultrasonic navigation, disinfecting light technology, and a water-efficient dripper system for autonomous and effective cleaning.

Integrated Bluetooth control for remote operation and customized cleaning.

Tech Stack:

Arduino IDE: Programming and controlling the Arduino Uno

ACHIEVEMENTS

- UiPath Student Developer Champion 2023-24
- GDSC WOW HACKATHON FINALIST
- Third Prize Winner in 'HACK-A-BOT' Hackathon

TRAINING

- **Full Stack Development - Java**
